Eurocon

Eurocon offers engineering services in forest, energy, mining, chemistry, workshop / life and pharmaceuticals. Eurocon has both high knowledge and strong networks in these are industries. Between these industries there are also clear synergies. Automation solutions are needed everywhere, and more than half of Eurocons's 240 employees are automation engineers. They are knowledgeable in the disciplines project management, process, mechanics and plant, electricity, electricity and instruments, systems and IT, HVAC, district heating and installation technology.

For a long time, Eurocon has developed the SiteBase tool, which is a software suite that streamlines, and quality assures information management in and around a facility or project. By combining SiteBase with consulting business, Eurocon can offer a total solution for maximum efficiency.
