

**Give the courier the best possible tool, and productivity will soar**

The Velove Armadillo bike path fit, ergonomics, comfort, safety, great handling, optimisation and containerisation is giving great access to city centers and **fantastic productivity numbers** in last mile delivery and field services -up to **100 % more productive** than vans in congested/restricted areas!

Every van that is replaced by our last mile solutions is making cities more liveable and **radically cuts resource and energy use**.

**A mix of go-kart, bicycle and van**

The Berliner Morgenpost called the Armadillo "A mix of go-kart, bicycle and van". We couldn't agree more to that description! The Armadillo is **pure pleasure to ride** and this is an important key to getting great productivity numbers.

**Blend in with the cyclists**

With a width of **only 86 cm** and a limited height, you can easily ride on bike paths to quickly get to your delivery destination, **increasing productivity without causing problems** for other cyclists.

**Containerisation makes city logistics great**

Containerisation is key to replacing vans with specialized last mile delivery vehicles. It makes the transfer of goods from a highway going motor vehicle to a light last mile vehicle **efficient** and **secure**.
